<b>OUTPUT REPORT COMMENTS</b> <b>(Info needed: Actual outputs completed or, if off target, please explain why.)</b>  <b>1ST QTR – Surface Water Section:</b> <b>SRO ACTIVITIES:</b> Deliverable #7a – On September 26, staff delivered a presentation to EPA summarizing historical surface water quality monitoring by Friends of the Santa Cruz River (FOSCR), permit-related monitoring by the U.S. International Boundary and Water Commission, and outfall monitoring by the Nogales, Sonora Public Works Department associated to flows within the Nogales International Wastewater Treatment Plant. The presentation summarized point sources of pollution impacting the Nogales Wash and Santa Cruz River. The presentation provided context for a September 28 stakeholder meeting to discuss a watershed implementation plan; staff participated at this EPA-hosted meeting and coordinated U.S. Geological Survey staff for a presentation on the ecosystem services provided by the river. In August, staff conducted quality assurance review of FOSCR volunteer flow monitoring data for the Santa Cruz River dating back to 1987 in order to supplement a watershed database being compiled by EPA's consultant, TetraTech. <b>2<sup>ND</sup> QTR: Surface Water Section:</b> Deliverable 1- ADEQ is on pace to submit 5 TMDLs (Gila River SSC (2), San Pedro <i>E. coli</i> , LCR SSC and <i>E. coli</i> to EPA for approval by June 30, 2013. Deliverable 2- Alamo Lake is currently in its 30-day public comment period, ending Jan 31 <sup>st</sup> . Deliverable 3- Four TIPs are included in 5 TMDLs (Gila River (2), San Pedro and LCR) and the LMR (Lake Mary Regional) TIP is being reviewed. The information in the LMR TIP will be used to develop TIPS for Parker Canyon and Alamo Lake. Deliverable 4- No additional effectiveness monitoring samples were collected in Q2. Deliverable 5- Quarterly updates have been completed. Deliverable 6- Monthly conference calls were made. Deliverable 7- Discussions continued between ADEQ, EPA and Tetra Tech. Summary report is due in Q3. <b>SRO Activities:</b> Deliverable 7b – On October 31, staff supported FOSCR with surface water sampling and delivery to a Tucson laboratory for their volunteer monitoring on the Santa Cruz River. On November 28, staff finalized a water quality and flow database reflecting data collected by IBWC, ADEQ and FOSCR in support of an Arizona-Mexico Commission action item focused on incorporating missing data into a Source Water Assessment Tool (SWAT) developed by the U.S. Geological Survey. In support of deliverable 7a, the database was shared with EPA for consideration of a proposed TMDL study for the Santa Cruz River.

The Grants and Outreach Unit will continue to hold \$1.2 million in CWA Section 319 funding for the project; unused funds will be incorporated into WQIG Program Cycle 13 for award in the spring of 2013. <b>Deliverable 9a.ii);</b> Extended to 6/13 (see Table 1.3.9 for details). <b>Deliverable 9a.iii);</b> Completed 9/12. <b>Deliverable 9a.iv);</b> WIP completed 10/12; group is investigating potential outreach and implementation projects that can be completed before the 12/12 expiration of this grant agreement. <b>Deliverable 9b);</b> Implementation of some BMPs has begun; Natural Channel Design is currently revising the BMP recommendation document to improve some of the design specifications. <b>Deliverable 9d);</b> Grants and Outreach staff have conducted site visits to evaluate the success of three closed out projects during the first quarter. Staff is creating an Access database of closed grants organized by project type that will allow us to develop a strategy for grant effectiveness evaluations that coordinates with TMDL effectiveness monitoring and Ambient Monitoring efforts. <b>Deliverable 10a);</b> Extended to 6/13 (MWS and NEMO; see comments for deliverable 7). <b>Deliverable 10b);</b> Staff has provided the U of A with a list of projects that will require load reduction modeling prior to the 2/13 deadline, and will work with the NEMO program in coming months to support this effort. <b>Deliverable 11b);</b> GRTS training has not yet been scheduled for FY13. <b>Deliverable 13);</b> FY14 funding will be available for award during the current grant cycle. Additional priorities for funding outside of the current grant cycle have not been finalized.</p> <p><b>2<sup>ND</sup> QTR: (Next Page)</b></p>

Work was done during the second quarter to compile a draft list of BMP resources for the website and will continue into the third quarter. <b>Deliverable 2b)</b> Staff are in the early stages of fact sheet development. Materials from states such as Utah and North Carolina that have developed robust E.coli/pathogen information for the public are being reviewed for guidance. <b>Deliverable 2c)</b> A draft list of frequently asked questions about the WQIG program and NPS pollution has been compiled, in addition to a detailed table that discusses the eligibility of many common BMPs. Work toward finalizing these documents will continue into the third quarter. <b>Deliverable 3a)</b> The final language for the ADEQ/BLM nonpoint source MOU has been approved by both parties, and is currently with BLM for signature. BLM will deliver the final MOU to ADEQ for signature the week of 1/14/13. <b>Deliverable 3b);</b> Grants and Outreach and TMDL staff met with NRCS staff 9/12 to identify joint nonpoint source priorities and discuss potential priority watersheds for USDA's FY13 National Water Quality Initiative (NWQI) funding. ADEQ has provided NRCS (and EPA) with a list of recommendations for priority 12-digit HUCs. EPA will be included in future NWQI discussions with NRCS. <b>Deliverable 7b)</b> Cycle 13 grant workshops were conducted 10/29/12 – 11/2/12 in Phoenix, Sedona, Prescott, and Safford via webinar. <b>Deliverable 7c)</b> Nine grant applications were accepted by the 11/30/12 submission deadline. Administrative review took place 12/12 and resulted in two applications being declared ineligible due to not impacting a water listed as impaired in ADEQ's draft 2010 assessment document. The remaining applications are currently undergoing technical review in accordance with the Cycle 13 timeline. <b>Deliverable 7e)</b> Technical support needs beyond the current U of A contracts will be determined once the FY14 workplan has been drafted (3/13). Necessary negotiations for continued support will be made at that time. <b>Deliverable 8ai)</b> ADEQ Grants, TMDL, Surface Water and WQD Director's Office staff met with ASLD and ADOA 11/28/12 to discuss timelines for moving forward with the Hillside Mine project. Further action is on hold until ASLD provides ADEQ with a decision regarding their willingness to accept the potential for Superfund cost recovery and move forward with the project. <b>Deliverable 9aii)</b> The deadline for the San Pedro WIP was extended to 6/13 during the first quarter. Refer to the Quarterly Status of Targeted Watersheds table for current status updates. <b>Deliverable 9b)</b> Grants and TMDL staff conducted a site visit for the Coyote Creek project to photograph and assess BMP implementation to date. <b>Deliverable 9d)</b> Grants and TMDL staff established a draft "Master Target List" (MTL) of waters/watersheds where effectiveness monitoring efforts will be concentrated over the next five years. Monitoring based on the MTL will be used to track water quality improvements tied to NPS-funded grant projects and other TMDL-spurred implementation activities throughout the state. <b>Deliverable 10a)</b> Dr Channah Rock's ISA to support WIP watersheds was extended to 6/13 during the first quarter. Dr. Rock continues to support the San Pedro group in their assessment of <i>E. coli</i> and other water quality data. <b>Deliverable 10b)</b> Grant staff continues to work with the Arizona NEMO program to calculate load reduction data. These inspections are part of the strategy to identify and require non-filers to obtain permits. Deliverable 10: The Water Quality Compliance Section provided a report on August 15, 2012 to the EPA. The enforcement actions included in the August 15, 2012 pertained to the FY12 Work Plan requirements. The next report will be sent to the EPA by the November 11, 2012 deadline. The WQCS is tracking the compliance schedules for 2 administrative orders. Deliverable 11a: QNCR submitted 9/7/2012. Deliverable 11b: QNVR submitted 9/24/12. Additional time is required to manually review the QNVR for errors in the report due to bugs in the database. Deliverable 11c: We have not received the 7/12 watch list. Deliverable 12: Migration is scheduled to be completed in December 2012.</p> <p><b>SRO Activities:</b> Deliverables #15 and #16 – During the latter part of August, staff documented multiple sanitary sewer overflows originating from failures in Nogales, Sonora wastewater infrastructure and impacting Arizona. Specifically, staff identified a construction-related breach of the 24" Ruiz Cortínez collector in Nogales, Sonora that flowed into Arizona via the Nogales Wash. This is the main collector in Nogales, Sonora that conveys wastewater to the International Outfall Interceptor (IOI) for treatment at the Nogales International Wastewater Treatment Plant in Rio Rico, Arizona. Staff also discovered two additional transboundary fugitive flows, from south to north – the first at Trickey Wash and the second at Cerro Pelón. Staff communicated with IBWC, and other partners of the Nogales Wash Emergency Response Plan to mitigate the fugitive transboundary flows quickly, sharing details with Santa Cruz County, City of Nogales, Arizona, Arizona Division of Emergency Management, and the Arizona-Sonora Border 2020 Emergency Response Task Force. Summary reports were prepared to inform the ADEQ Director's Office and for briefing the Arizona governor's office.</p> <p>Also during this reporting cycle: staff members attended the US-IBWC Southeast Arizona Citizens' Forum meeting; participated in and helped prepare and review documents for the Good Neighbor Environmental Board Water Treatment Workgroup meetings; reviewed IBWC minutes regarding Nogales and Naco; worked with IBWC to perform sampling after fugitive flows and to mitigate them; informed Nogales, Arizona of debris in the Nogales Wash that could pose a threat to an above ground sewer main and followed up with the city until the threat was mitigated.</p> <p><b>2<sup>ND</sup> QTR: (Next Page)</b></p>			

### FOOTNOTES:

(\*) EPA's policy defines "timely" enforcement as formal enforcement taken against a facility in significant non-compliance ("SNC") within 5 ½ months of the end of the quarter in which the facility first appears as SNC on a Quarterly Non-Compliance Report ("QNCR"). Formal enforcement is defined by EPA as an administrative order or civil action that requires the facility to return to compliance. EPA will consider taking formal enforcement action against SNC facilities if ADEQ does not issue a timely formal enforcement action.

Improved communication with the regulated community has been linked to improved binational wastewater quality. On October 18, staff delivered prepared sample bottles to La Cromadora for wastewater quality analysis offered by Alcoa Fastening Systems in Tucson, Arizona, as technical assistance with the goal of improving peer-to-peer relationships. <b>Deliverable 14-16</b> – On October 18, staff participated in a Binational Technical Committee (BTC) meeting hosted by IBWC. At the meeting, sanitary sewer overflows and wastewater quality challenges and recommendations were discussed amongst principal stakeholders including the Nogales, Sonora Wastewater Utility and La Cromadora Internacional. Staff prepared a detailed meeting summary for stakeholder distribution by IBWC. Two transboundary sewer flows into the Nogales Wash were reported by IBWC during the second quarter. On October 23, the Ruiz Cortínez collector construction site (a road bridge is being constructed at this site) had another premeditated breach of the sewer line. This collector is the main conveyance of wastewater from Nogales, Sonora, to the Nogales International Wastewater Treatment Plant in Rio Rico, Arizona. Staff developed a summary related to this breach of the Ruiz Corinez collector in Nogales, Sonora. On December 17, OOMAPAS had an operational problem with a sewage collection line. Staff attended the IBWC Southeast Arizona Citizens’ Forum on October 11, 2012. Staff assisted with completion of the 15th Report of the Good Neighbor Environmental Board that was transmitted to the President and Congress on December 12.</p>
